

Q2- Study Tables Module

Accurate Tracking in Dynamic
Study Environments

2:00pm – 2:50pm

Mojave

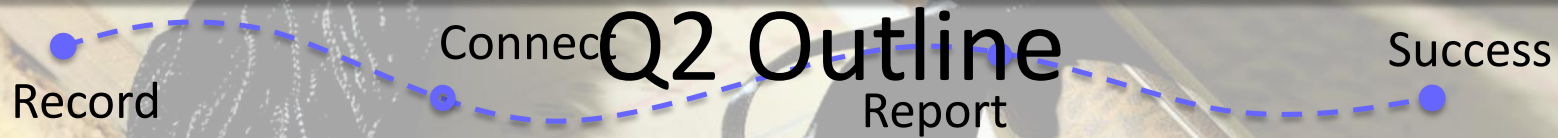

What Is Q2

- Q2 is a new way to incorporate a Consultant assisted Study room environment into your Trac system.
- During a single visit your staff has the ability to record multiple individual interactions with students (Table Visits).
- Report on overall visit and individual Consultant visits and even compare the data together!

Can I use Q2?

- Do you have a Study table based Center?
- Do your Students that, in a single Visit, study in more than one Subject?
- Do you have Consultants that float and assist Students in need?
- Do you need to record individual interactions with Students that might occur throughout the visit?

 - Asking for Help via Technology (Email on sign in, QR code, Phone, tablet)
- Consultant Experience
 - Logging in
 - Managing the Student list
 - Assisting a student
 - Recording a visit
- Administrator Experience
 - Reporting on activity

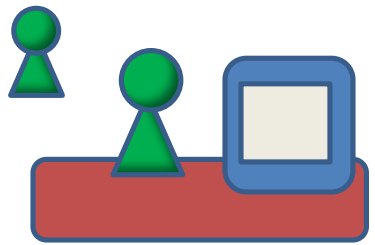

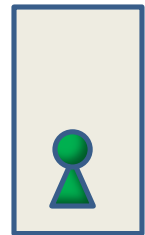

Q2 Administration

User purchase a Q2 Config for each independent Study Table Program

Q2 config consists of 2 centers

- Q2 Center Visits
 - This Center records the students overall time in the center. From the time they enter to the time they leave
- Q2 Table Visits
 - This Center records the interactions between consultants and Students
- From a end user perspective this is viewed as a single Center. On the back end you have the ability to run reports on one or both Q2 centers.
